## **Immunology and Evolution of Infectious Disease** Steven A. Frank

From HIV to influenza, the battle between infectious agents and the immune system is at the heart of disease. Knowledge of how and why parasites vary to escape recognition by the immune system is central to vaccine design, the control of epidemics, and our fundamental understanding of parasite ecology and evolution. As the first comprehensive synthesis of parasite variation at the molecular, population, and evolutionary levels, this book is essential reading for students and researchers throughout biology and biomedicine.

The author uses an evolutionary perspective to meld the terms and findings of molecular biology, immunology, pathogen biology, and population dynamics. This multidisciplinary approach offers newcomers a readable introduction while giving specialists an invaluable guide to allied subjects. Every aspect of the immune response is presented in the functional context of parasite recognition and defense--an emphasis that gives structure to a tremendous amount of data and brings into sharp focus the great complexity of immunology. The problems that end each chapter set the challenge for future research, and the text includes extensive discussion of HIV, influenza, foot-and-mouth disease, and many other pathogens.

This is the only book that treats in an integrated way all factors affecting variation in infectious disease. It is a superb teaching tool and a rich source of ideas for new and experienced researchers. For molecular biologists, immunologists, and evolutionary biologists, this book provides new insight into infectious agents, immunity, and the evolution of infectious disease.

### **From reader reviews:**

#### **Mary Sylvester:**

Reading a reserve can be one of a lot of task that everyone in the world enjoys. Do you like reading book therefore. There are a lot of reasons why people like it. First reading a e-book will give you a lot of new details. When you read a book you will get new information due to the fact book is one of several ways to share the information or their idea. Second, reading through a book will make you more imaginative. When you studying a book especially tale fantasy book the author will bring one to imagine the story how the character types do it anything. Third, you can share your knowledge to other people. When you read this Immunology and Evolution of Infectious Disease, you could tells your family, friends and also soon about yours publication. Your knowledge can inspire different ones, make them reading a book.

#### **Maria Green:**

The publication untitled Immunology and Evolution of Infectious Disease is the guide that recommended to you to learn. You can see the quality of the guide content that will be shown to anyone. The language that writer use to explained their way of doing something is easily to understand. The article writer was did a lot of research when write the book, and so the information that they share for your requirements is absolutely accurate. You also could get the e-book of Immunology and Evolution of Infectious Disease from the publisher to make you more enjoy free time.

#### **Betty Johnston:**

Playing with family in the park, coming to see the marine world or hanging out with buddies is thing that usually you could have done when you have spare time, and then why you don't try point that really opposite from that. A single activity that make you not sense tired but still relaxing, trilling like on roller coaster you already been ride on and with addition info. Even you love Immunology and Evolution of Infectious Disease, you may enjoy both. It is fine combination right, you still need to miss it? What kind of hang-out type is it? Oh occur its mind hangout people. What? Still don't obtain it, oh come on its identified as reading friends.

#### **Laree Drummond:**

Reading a reserve make you to get more knowledge from it. You can take knowledge and information from a book. Book is written or printed or descriptive from each source which filled update of news. With this modern era like today, many ways to get information are available for an individual. From media social like newspaper, magazines, science book, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Do you want to spend your spare time to open your book? Or just searching for the Immunology and Evolution of Infectious Disease when you needed it?
