LCP for Microwave Packages and Modules (The Cambridge RF and Microwave Engineering Series)

Anh-Vu H. Pham, Morgan J. Chen, Kunia Aihara

A comprehensive overview of electrical design using Liquid Crystal Polymer (LCP), giving you everything you need to know to get up-to-speed on the subject. This text describes successful design and development techniques for high-performance microwave and millimeter-wave packages and modules in an organic platform. These were specifically developed to make the most of LCP's inert, hermetic, low-cost, high-frequency (DC to 110+ GHz) properties. First-hand accounts show you how to avoid various pitfalls during design and development. You'll get extensive electrical design details in areas of broadband circuit design for low-loss interconnects, couplers, splitters/combiners, baluns, phase shifters, time-delay units (TDU), power amplifier (PA) modules, receiver modules, phased-array antennas, flexible electronics, surface mounted packages, Microelectromechanical Systems (MEMS) and reliability. Ideal for engineers in the fields of RF, microwave, signal integrity, advanced packaging, material science, optical and biomedical engineering.

From reader reviews:

Douglas Barlow:

As people who live in the actual modest era should be revise about what going on or facts even knowledge to make these keep up with the era that is certainly always change and progress. Some of you maybe will probably update themselves by reading through books. It is a good choice in your case but the problems coming to you actually is you don't know which you should start with. This LCP for Microwave Packages and Modules (The Cambridge RF and Microwave Engineering Series) is our recommendation so you keep up with the world. Why, because book serves what you want and need in this era.

Mark Thomas:

Now a day folks who Living in the era exactly where everything reachable by interact with the internet and the resources inside it can be true or not involve people to be aware of each information they get. How a lot more to be smart in having any information nowadays? Of course the correct answer is reading a book. Reading through a book can help people out of this uncertainty Information especially this LCP for Microwave Packages and Modules (The Cambridge RF and Microwave Engineering Series) book since this book offers you rich details and knowledge. Of course the information in this book hundred % guarantees there is no doubt in it you know.

Mary Moore:

The reserve with title LCP for Microwave Packages and Modules (The Cambridge RF and Microwave Engineering Series) includes a lot of information that you can understand it. You can get a lot of benefit after read this book. This kind of book exist new understanding the information that exist in this publication represented the condition of the world today. That is important to yo7u to find out how the improvement of the world. This particular book will bring you in new era of the glowbal growth. You can read the e-book on your own smart phone, so you can read this anywhere you want.

Amy Tharp:

LCP for Microwave Packages and Modules (The Cambridge RF and Microwave Engineering Series) can be one of your basic books that are good idea. Most of us recommend that straight away because this e-book has good vocabulary that can increase your knowledge in words, easy to understand, bit entertaining but delivering the information. The copy writer giving his/her effort to put every word into delight arrangement in writing LCP for Microwave Packages and Modules (The Cambridge RF and Microwave Engineering Series) however doesn't forget the main stage, giving the reader the hottest along with based confirm resource facts that maybe you can be among it. This great information can certainly drawn you into fresh stage of crucial imagining.
