M. Fitting, Richard L. Mendelsohn

First-Order Modal Logic (Synthese Library) M. Fitting, Richard L. Mendelsohn

This is a thorough treatment of first-order modal logic. The book covers such issues as quantification, equality (including a treatment of Frege's morning star/evening star puzzle), the notion of existence, non-rigid constants and function symbols, predicate abstraction, the distinction between nonexistence and nondesignation, and definite descriptions, borrowing from both Fregean and Russellian paradigms.
