Maximum Likelihood Estimation with Stata, Fourth Edition William Gould, Jeffrey Pitblado, Brian Poi

Maximum Likelihood Estimation with Stata, Fourth Edition is written for researchers in all disciplines who need to compute maximum likelihood estimators that are not available as prepackaged routines. Readers are presumed to be familiar with Stata, but no special programming skills are assumed except in the last few chapters, which detail how to add a new estimation command to Stata. The book begins with an introduction to the theory of maximum likelihood estimation with particular attention on the practical implications for applied work. Individual chapters then describe in detail each of the four types of likelihood evaluator programs and provide numerous examples, such as logit and probit regression, Weibull regression, random-effects linear regression, and the Cox proportional hazards model. Later chapters and appendixes provide additional details about the ml command, provide checklists to follow when writing evaluators, and show how to write your own estimation commands.

From reader reviews:

Monica Ceja:

Do you have favorite book? Should you have, what is your favorite's book? Book is very important thing for us to find out everything in the world. Each reserve has different aim or perhaps goal; it means that reserve has different type. Some people feel enjoy to spend their a chance to read a book. They are reading whatever they take because their hobby is usually reading a book. Think about the person who don't like looking at a book? Sometime, individual feel need book after they found difficult problem or perhaps exercise. Well, probably you'll have this Maximum Likelihood Estimation with Stata, Fourth Edition.

James Hall:

What do you about book? It is not important along? Or just adding material when you require something to explain what you problem? How about your spare time? Or are you busy individual? If you don't have spare time to perform others business, it is give you a sense of feeling bored faster. And you have free time? What did you do? Everyone has many questions above. The doctor has to answer that question because just their can do that. It said that about reserve. Book is familiar on every person. Yes, it is right. Because start from on kindergarten until university need this kind of Maximum Likelihood Estimation with Stata, Fourth Edition to read.

Pearl Dyson:

Reading can called mind hangout, why? Because when you find yourself reading a book especially book entitled Maximum Likelihood Estimation with Stata, Fourth Edition the mind will drift away trough every dimension, wandering in every aspect that maybe unknown for but surely can be your mind friends. Imaging every single word written in a publication then become one contact form conclusion and explanation in which maybe you never get before. The Maximum Likelihood Estimation with Stata, Fourth Edition giving you an additional experience more than blown away the mind but also giving you useful info for your better life within this era. So now let us explain to you the relaxing pattern here is your body and mind is going to be pleased when you are finished studying it, like winning a. Do you want to try this extraordinary spending spare time activity?

Johanna Land:

That publication can make you to feel relax. That book Maximum Likelihood Estimation with Stata, Fourth Edition was colourful and of course has pictures on the website. As we know that book Maximum Likelihood Estimation with Stata, Fourth Edition has many kinds or variety. Start from kids until youngsters. For example Naruto or Investigator Conan you can read and think you are the character on there. Therefore , not at all of book usually are make you bored, any it offers up you feel happy, fun and loosen up. Try to choose the best book for yourself and try to like reading this.
