## Studying Virtual Math Teams (Computer-Supported Collaborative Learning Series)

*Studying Virtual Math Teams* centers on detailed empirical studies of how students in small online groups make sense of math issues and how they solve problems by making meaning together. These studies are woven together with materials that describe the online environment and pedagogical orientation, as well as reflections on the theoretical implications of the findings in the studies. The nature of group cognition and shared meaning making in collaborative learning is a foundational research issue in CSCL. More generally, the theme of sense making is a central topic in information science. While many authors allude to these topics, few have provided this kind of detailed analysis of the mechanisms of intersubjective meaning making.

This book presents a coherent research agenda that has been pursued by the author and his research group. The book opens with descriptions of the project and its methodology, as well as situating this research in the past and present context of the CSCL research field. The core research team then presents five concrete analyses of group interactions in different phases of the Virtual Math Teams research project. These chapters are followed by several studies by international collaborators, discussing the group discourse, the software affordances and alternative representations of the interaction, all using data from the VMT project. The concluding chapters address implications for the theory of group cognition and for the methodology of the learning sciences. In addition to substantial introductory and concluding chapters, this important new book includes analyses based upon the author's previous research, thereby providing smooth continuity and an engaging flow that follows the progression of the research.

The VMT project has dual goals: (a) to provide a source of experience and data for practical and theoretical explorations of group knowledge building and (b) to develop an effective online environment and educational service for collaborative learning of mathematics. *Studying Virtual Math Teams* reflects these twin orientations, reviewing the intertwined aims and development of a rigorous science of small-group cognition and a Web 2.0 educational math service. It documents the kinds of interactional methods that small groups use to explore math issues and provides a glimpse into the potential of online interaction to promote productive math discourse.

### **From reader reviews:**

#### **Ronald Brun:**

Throughout other case, little men and women like to read book Studying Virtual Math Teams (Computer-Supported Collaborative Learning Series). You can choose the best book if you love reading a book. Given that we know about how is important a new book Studying Virtual Math Teams (Computer-Supported Collaborative Learning Series). You can add information and of course you can around the world with a book. Absolutely right, mainly because from book you can know everything! From your country until foreign or abroad you can be known. About simple matter until wonderful thing it is possible to know that. In this era, you can open a book as well as searching by internet gadget. It is called e-book. You may use it when you feel weary to go to the library. Let's read.

#### **Stephen Ziegler:**

This Studying Virtual Math Teams (Computer-Supported Collaborative Learning Series) book is just not ordinary book, you have it then the world is in your hands. The benefit you receive by reading this book will be information inside this publication incredible fresh, you will get data which is getting deeper you read a lot of information you will get. That Studying Virtual Math Teams (Computer-Supported Collaborative Learning Series) without we realize teach the one who examining it become critical in contemplating and analyzing. Don't be worry Studying Virtual Math Teams (Computer-Supported Collaborative Learning Series) can bring whenever you are and not make your handbag space or bookshelves' become full because you can have it with your lovely laptop even cellphone. This Studying Virtual Math Teams (Computer-Supported Collaborative Learning Series) having excellent arrangement in word in addition to layout, so you will not sense uninterested in reading.

#### **Brandi Johnson:**

Studying Virtual Math Teams (Computer-Supported Collaborative Learning Series) can be one of your basic books that are good idea. Many of us recommend that straight away because this publication has good vocabulary which could increase your knowledge in terminology, easy to understand, bit entertaining however delivering the information. The copy writer giving his/her effort to get every word into satisfaction arrangement in writing Studying Virtual Math Teams (Computer-Supported Collaborative Learning Series) but doesn't forget the main point, giving the reader the hottest in addition to based confirm resource facts that maybe you can be among it. This great information can certainly drawn you into new stage of crucial imagining.

#### **Audra Yoder:**

You could spend your free time to read this book this reserve. This Studying Virtual Math Teams (Computer-Supported Collaborative Learning Series) is simple bringing you can read it in the park, in the beach, train and soon. If you did not have got much space to bring often the printed book, you can buy often

the e-book. It is make you simpler to read it. You can save often the book in your smart phone. Thus there are a lot of benefits that you will get when one buys this book.
