An Investigation of the Laws of Thought

On which are founded the mathematical theories of logic and probabilities

By George Boole

The Laws of Thought, more precisely, An Investigation of the Laws of Thought on Which are Founded the Mathematical Theories of Logic and Probabilities, was an influential 19th century book by George Boole, the second of his two monographs on algebraic logic. It was published in 1854. Boole was Professor of Mathematics of then Queen's College, Cork in Ireland.

The following work is not a republication of a former treatise by the Author, entitled, "The Mathematical Analysis of Logic." Its earlier portion is indeed devoted to the same object, and it begins by establishing the same system of fundamental laws, but its methods are more general, and its range of applications far wider. It exhibits the results, matured by some years of study and reflection, of a principle of investigation relating to the intellectual operations, the previous exposition of which was written within a few weeks after its idea had been conceived.

That portion of this work which relates to Logic presupposes in its reader a knowledge of the most important terms of the science, as usually treated, and of its general object. On these points there is no better guide than Archbishop Whately's "Elements of Logic," or Mr. Thomson's "Outlines of the Laws of Thought." To the former of these treatises, the present revival of attention to this class of studies seems in a great measure due. Some acquaintance with the principles of Algebra is also requisite, but it is not necessary that this application should have been carried beyond the solution of simple equations. For the study of those chapters which relate to the theory of probabilities, a somewhat larger knowledge of Algebra is required, and especially of the doctrine of Elimination, and of the solution of Equations containing more than one unknown quantity.

From reader reviews:

Regina Rodgers:

Here thing why this specific An Investigation of the Laws of Thought: On which are founded the mathematical theories of logic and probabilities are different and dependable to be yours. First of all studying a book is good but it really depends in the content than it which is the content is as tasty as food or not. An Investigation of the Laws of Thought: On which are founded the mathematical theories of logic and probabilities giving you information deeper and in different ways, you can find any e-book out there but there is no book that similar with An Investigation of the Laws of Thought: On which are founded the mathematical theories of logic and probabilities. It gives you thrill looking at journey, its open up your personal eyes about the thing this happened in the world which is might be can be happened around you. You can bring everywhere like in recreation area, café, or even in your technique home by train. In case you are having difficulties in bringing the paper book maybe the form of An Investigation of the Laws of Thought: On which are founded the mathematical theories of logic and probabilities in e-book can be your alternate.

Ruth Michel:

Nowadays reading books be than want or need but also get a life style. This reading practice give you lot of advantages. The advantages you got of course the knowledge the rest of the information inside the book in which improve your knowledge and information. The data you get based on what kind of publication you read, if you want attract knowledge just go with education and learning books but if you want sense happy read one together with theme for entertaining for instance comic or novel. Typically the An Investigation of the Laws of Thought: On which are founded the mathematical theories of logic and probabilities is kind of book which is giving the reader unstable experience.

Joseph Singleton:

Hey guys, do you would like to finds a new book to study? May be the book with the concept An Investigation of the Laws of Thought: On which are founded the mathematical theories of logic and probabilities suitable to you? Typically the book was written by well known writer in this era. Typically the book untitled An Investigation of the Laws of Thought: On which are founded the mathematical theories of logic and probabilities is a single of several books in which everyone read now. This specific book was inspired lots of people in the world. When you read this book you will enter the new way of measuring that you ever know previous to. The author explained their strategy in the simple way, and so all of people can easily to comprehend the core of this e-book. This book will give you a wide range of information about this world now. In order to see the represented of the world on this book.

Charles Parker:

What is your hobby? Have you heard in which question when you got students? We believe that that

problem was given by teacher to their students. Many kinds of hobby, Everyone has different hobby. And also you know that little person such as reading or as reading become their hobby. You need to know that reading is very important in addition to book as to be the factor. Book is important thing to include you knowledge, except your personal teacher or lecturer. You get good news or update regarding something by book. Numerous books that can you choose to use be your object. One of them are these claims An Investigation of the Laws of Thought: On which are founded the mathematical theories of logic and probabilities.
