## **History: Fiction or Science?: Dating methods as offered by mathematical statistics, eclipses and zodiacs (Chronology) (Volume 1)** Dr Anatoly T Fomenko, Dr Gleb V Nosovskiy

History: Fiction or Science? is the most explosive tractate on history ever written – however, every theory it contains, no matter how unorthodox, is backed by solid scientific data. Mainstream history ‘science’ says that after some 1000 years of sound sleep Europeans suddenly woke up as Christians to the hilt, armed themselves and started touring-crusading Middle East during 200 years to punish at last tormentors of Jesus, searching for the Saint Sepulchre, Saint Graals, Saint spears, nails and bits of Saint Cross and other reliques and curiosities. Christians finished their tour with a bang by sacking Constantinople allegedly in 1204 a.d. Local populations became muslims, crusaded back and built a Caliphate that span from Arabia to Morocco and North Africa, took Constantinople in 1453 a.d. Dr. Fomenko calls all this ‘science’ wrong. The Europeans did not hibernate for 1000 years before going after the wrongdoers. Dr. Fomenko’s New Chronology sees the history of the world religions as follows: the pre-Christian period (prior to XI c. and Jesus Christ), Bacchic hristianity (XI-XII c., before and after Jesus Christ), Jesus Christ Christianity (XII-XIV c.) with its subsequent mutations in XV-XVII centuries into Orthodox Christianity, the Catholic Christianity, Protestant Christianity, Islam, Buddhism, etc. Religious wars were a way of life. Dr. Fomenko does forensics with Occam's razor on the beautiful body of the world history. Its skeleton looks very different from one of the mainstream history. The author sees it very much compressed: all real events that took place over 1200 years ago as well as people who allegedly acted in them are simply unknown to us and will stay so forever. Ancient Egypt, Europe, Rome, China, India, etc..etc histories are simply figmental prior to that date. Homo sapience could neither read, nor write as yet. That was actually prehistory. Everything that is told to us about events that happened 1200 years ago is fiction. Human ‘civilization’ has yet to be worked out by homo sapience crowd. Civilisation started its relentless march with lots of sweat, blood and tears only about 800 a.d. Civilisation has developed its major features like writing, communications, religions and arts, centralised civil and military management only by 1000 a.d. Homo sapience sapiences did not sit on their hands – they applied immediately what they discovered and invented. Dr Fomenko et al. suspect that: Jesus Christ was born in 1152 a.d. and crucified in 1185 a.d. Both the New and the Old Testaments refer to mediaeval events. Apocalypse was written in 1486 a.d. Does this sound uncanny? This version of events is substantiated by hard facts and logic, validated by new astronomical research and statistical analysis of ancient sources – to a greater extent than everything you may have read and heard about history before. The dominating historical discourse in its current state was essentially crafted in the XVI century from a rather contradictory jumble of sources such as innumerable copies of ancient Latin and Greek manuscripts whose originals had vanished in the Dark Ages and the allegedly irrefutable proof offered by late mediaeval astronomers, resting upon the power of ecclesial authorities. Nearly all of its components are blatantly untrue! For some of us, it shall possibly be quite disturbing to see the magnificent edifice of classical history turn into a snake pit of mediaeval politics. Twice so, in fact: the first time, millenarian dust on the ancient marble turn into a mere layer of dirt. The second, and greater, attack of unease comes with the awareness of just how many areas of human knowledge still trust the three elephants of the consensual chronology to support them. Dr. Fomenko et al. are waiting to repent and retract if exact sciences produce valid objective refutations thereof.

**From reader reviews:**

**Lorraine Edler:**

The book History: Fiction or Science?: Dating methods as offered by mathematical statistics, eclipses and zodiacs (Chronology) (Volume 1) gives you the sense of being enjoy for your spare time. You may use to make your capable far more increase. Book can for being your best friend when you getting anxiety or having big problem with your subject. If you can make reading a book History: Fiction or Science?: Dating methods as offered by mathematical statistics, eclipses and zodiacs (Chronology) (Volume 1) being your habit, you can get considerably more advantages, like add your current capable, increase your knowledge about several or all subjects. You could know everything if you like open and read a reserve History: Fiction or Science?: Dating methods as offered by mathematical statistics, eclipses and zodiacs (Chronology) (Volume 1). Kinds of book are several. It means that, science publication or encyclopedia or other individuals. So , how do you think about this guide?

**Marie Brenneman:**

This History: Fiction or Science?: Dating methods as offered by mathematical statistics, eclipses and zodiacs (Chronology) (Volume 1) are reliable for you who want to certainly be a successful person, why. The main reason of this History: Fiction or Science?: Dating methods as offered by mathematical statistics, eclipses and zodiacs (Chronology) (Volume 1) can be one of many great books you must have is usually giving you more than just simple looking at food but feed you actually with information that perhaps will shock your prior knowledge. This book is actually handy, you can bring it everywhere and whenever your conditions throughout the e-book and printed types. Beside that this History: Fiction or Science?: Dating methods as offered by mathematical statistics, eclipses and zodiacs (Chronology) (Volume 1) giving you an enormous of experience for example rich vocabulary, giving you trial run of critical thinking that we know it useful in your day pastime. So , let's have it and enjoy reading.

**Paula Salas:**

Precisely why? Because this History: Fiction or Science?: Dating methods as offered by mathematical statistics, eclipses and zodiacs (Chronology) (Volume 1) is an unordinary book that the inside of the guide waiting for you to snap the idea but latter it will zap you with the secret this inside. Reading this book beside it was fantastic author who else write the book in such awesome way makes the content on the inside easier to understand, entertaining method but still convey the meaning thoroughly. So , it is good for you because of not hesitating having this nowadays or you going to regret it. This phenomenal book will give you a lot of rewards than the other book have got such as help improving your ability and your critical thinking technique. So , still want to hesitate having that book? If I had been you I will go to the e-book store hurriedly.

**Lyle Morales:**

This History: Fiction or Science?: Dating methods as offered by mathematical statistics, eclipses and zodiacs (Chronology) (Volume 1) is completely new way for you who has interest to look for some information given it relief your hunger of information. Getting deeper you on it getting knowledge more you know or else you who still having little digest in reading this History: Fiction or Science?: Dating methods as offered by mathematical statistics, eclipses and zodiacs (Chronology) (Volume 1) can be the light food for you because the information inside this book is easy to get by anyone. These books produce itself in the form that is reachable by anyone, yep I mean in the e-book contact form. People who think that in book form make them feel sleepy even dizzy this guide is the answer. So there is not any in reading a publication especially this one. You can find what you are looking for. It should be here for an individual. So , don't miss the idea! Just read this e-book variety for your better life and knowledge.
