Elsevier's Dictionary of Mathematics: In English, German, French and Russian K. Peeva, H.-J. Vogel, R. Lozanov, P.N. Peeva

Elsevier's Dictionary of Mathematics contains 11,652 entries with more than 4,750 cross-references. Selection of the terms was based either on their significance or on their frequency of use according to authoritative encyclopedias, dictionaries and textbooks. Included are both modern developments and contemporary changes in terminology as well as recently established terms.

The terminology covers all the major branches from elementary to advanced subjects: arithmetic, algebra, geometry, set theory, discrete mathematics, logic, Boolean algebra, linear algebra, matrix algebra, calculus, differential equations, vector algebra, field theory, probability theory and statistics, optimization, numerical methods, mathematical programming, modern algebra, algebraic structures, computer algebra, category theory, applied mathematics, theory of automata and formal languages, theory of games, theory of graphs, as well as some commonly used entries in computer architecture, hardware, communications, system and application software, microprogramming, etc.

This work will provide readers, writers and translators with a guide of the most widely used terms and collections in the area, and will prove to be a useful tool for all professionals exploring the multilingual scientific terminology.

From reader reviews:

Michael Albright:

What do you concerning book? It is not important along with you? Or just adding material when you want something to explain what you problem? How about your time? Or are you busy particular person? If you don't have spare time to complete others business, it is make you feel bored faster. And you have time? What did you do? Every person has many questions above. They must answer that question due to the fact just their can do which. It said that about publication. Book is familiar on every person. Yes, it is correct. Because start from on kindergarten until university need that Elsevier's Dictionary of Mathematics: In English, German, French and Russian to read.

Anita Sizemore:

In this 21st century, people become competitive in every single way. By being competitive now, people have do something to make these people survives, being in the middle of the actual crowded place and notice simply by surrounding. One thing that sometimes many people have underestimated the item for a while is reading. Yes, by reading a publication your ability to survive enhance then having chance to stay than other is high. In your case who want to start reading a book, we give you that Elsevier's Dictionary of Mathematics: In English, German, French and Russian book as beginner and daily reading reserve. Why, because this book is usually more than just a book.

Mary Ruch:

As a scholar exactly feel bored to be able to reading. If their teacher expected them to go to the library or to make summary for some publication, they are complained. Just minor students that has reading's heart and soul or real their interest. They just do what the teacher want, like asked to the library. They go to generally there but nothing reading very seriously. Any students feel that examining is not important, boring in addition to can't see colorful photos on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this age, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore , this Elsevier's Dictionary of Mathematics: In English, German, French and Russian can make you really feel more interested to read.

Helen Christopher:

What is your hobby? Have you heard that question when you got pupils? We believe that that problem was given by teacher to their students. Many kinds of hobby, Everybody has different hobby. And you also know that little person just like reading or as examining become their hobby. You need to understand that reading is very important as well as book as to be the factor. Book is important thing to add you knowledge, except your own teacher or lecturer. You get good news or update about something by book. Many kinds of books that can you take to be your object. One of them is this Elsevier's Dictionary of Mathematics: In English, German, French and Russian.
