The Northern Neonatal Network

Neonatal Formulary 3 The Northern Neonatal Network

This major reference text provides in a compact, and regularly updated form all the information that doctors, midwives and nurses need to know about the prescribing of drugs, and about their safe and accurate administration.

Information on placental transfer, teratogenicity, and toxicity is provided for each listed drug, as is information on the extent to which the drug appears in breast milk (and the extent to which this matters). A whole page monograph is provided for all the commonly used drugs, blood products and vaccines and for a range of "orphan" drugs not mentioned in other standard formularies. Key references to the recently published literature are provided for each drug.

Guidance is also given on drug storage, safe drug administration, the care and use of intravascular lines and the recognition, management and reporting of adverse reactions. There is also introductory advice on the management of suspected infection, renal failure, neonatal pain, circulatory and vascular problems and the control of seizures.

The Neonatal Formulary is an invaluable reference in all hospital maternity departments.
