## **Woman Battering in the United States: Till Death Do Us Part** Helen M. Eigenberg

A combination text and reader address-ing a much-needed topic. This cutting-edge and provocative text, written from a feminist perspective, concentrates on women's experiences of victimization--specifically battering. Eigenberg includes informative articles that enhance and complement the fundamental concepts presented in the book. Like other types of violence against women, battering has long been ignored by academics, professionals, and policymakers who focus instead on violent, random crime committed by strangers. This much-needed volume, appropriate for both under-graduate and graduate courses, challenges readers to think critically about the social construction of crime--how social definitions of crime might change if the magnitude and seriousness of woman battering were addressed. Salient features: 1) demonstrates how a feminist, social constructionist perspective on women battering differs from other perspectives; 2) shows ways in which woman battering serves as a means of social control; and 3) examines how society minimalizes the extent and magnitude of woman battering.
