The Passivhaus Handbook: A Practical Guide to Constructing and Retrofitting Buildings for Ultra-Low Energy Performance (Sustainable Building) Janet Cotterell, Adam Dadeby

An essential guide for anyone wanting to realize a supremely comfortable, healthy, and durable home with exceptionally low energy costs, this book brings together current thinking and best practice in Passivhaus design. This type of design focuses on getting the building fabric right, to achieve ultralow energy consumption in the most cost-effective manner. The approach is relevant to a wide range of building types and climates. Whether you are building an extension, retrofitting your house or starting from scratch, and whether you are new to low-energy design or already have some experience, this book will help you navigate around the potential pitfalls and misconceptions. The book includes a clear explanation of the underlying building physics and terminology; detailed information on key elements of Passivhaus: avoiding air leakage, designing out thermal (cold) bridges, moisture management, and ventilation strategy. It offers practical advice on setting up a project, including developing a motivated project team, and a discussion of economic considerations and the policy context in the UK. As pressure on global resources increases and energy prices continue to rise, the Passovhaus approach, proven over 20 years, meets the challenge of ultralow-energy building for the future.

From reader reviews:

Madeleine Bandy:

Book is definitely written, printed, or created for everything. You can realize everything you want by a reserve. Book has a different type. As it is known to us that book is important issue to bring us around the world. Close to that you can your reading skill was fluently. A reserve The Passivhaus Handbook: A Practical Guide to Constructing and Retrofitting Buildings for Ultra-Low Energy Performance (Sustainable Building) will make you to always be smarter. You can feel more confidence if you can know about every thing. But some of you think that will open or reading any book make you bored. It's not make you fun. Why they might be thought like that? Have you searching for best book or ideal book with you?

Mary Hanlon:

Information is provisions for anyone to get better life, information nowadays can get by anyone with everywhere. The information can be a knowledge or any news even a concern. What people must be consider any time those information which is inside former life are challenging to be find than now's taking seriously which one would work to believe or which one the particular resource are convinced. If you get the unstable resource then you buy it as your main information we will see huge disadvantage for you. All of those possibilities will not happen with you if you take The Passivhaus Handbook: A Practical Guide to Constructing and Retrofitting Buildings for Ultra-Low Energy Performance (Sustainable Building) as your daily resource information.

Linda Soto:

Reading a book to become new life style in this calendar year; every people loves to study a book. When you go through a book you can get a great deal of benefit. When you read publications, you can improve your knowledge, mainly because book has a lot of information into it. The information that you will get depend on what kinds of book that you have read. In order to get information about your research, you can read education books, but if you want to entertain yourself look for a fiction books, such us novel, comics, and also soon. The The Passivhaus Handbook: A Practical Guide to Constructing and Retrofitting Buildings for Ultra-Low Energy Performance (Sustainable Building) will give you a new experience in reading through a book.

Elbert Lupton:

As a scholar exactly feel bored to help reading. If their teacher inquired them to go to the library or make summary for some reserve, they are complained. Just very little students that has reading's heart or real their pastime. They just do what the professor want, like asked to the library. They go to presently there but nothing reading significantly. Any students feel that studying is not important, boring along with can't see colorful photographs on there. Yeah, it is being complicated. Book is very important for you personally. As

we know that on this period, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this The Passivhaus Handbook: A Practical Guide to Constructing and Retrofitting Buildings for Ultra-Low Energy Performance (Sustainable Building) can make you sense more interested to read.
