Making America: The Society and Culture of the United States

Making America: The Society and Culture of the United States

In this richly interdisciplinary work twenty-eight of the nation's leading critics and scholars offer a comprehensive exploration of American society and culture. Each outstanding in his or her own field, the contributors address "America" from a diversity of disciplines, personal histories, regions, and political perspectives.

Making America is a dynamic account of the American experience, from matters of landscape, immigration, and urbanization; to manners, literature, and the arts; social organization and values; religion, science, philosophy, and law. An introduction and twenty-six skillfully written chapters combine historical developments with critical analyses in a broad portrait of the United States. Taken in sequence, the essays will provoke readers to experience the still-evolving society and complex cultures of the American people. Since the chapters are equally valuable when considered individually, the construction of this volume also encourages selective reading.

Refreshingly accessible, *Making America* is essential for students and scholars across the field of American Studies and for general readers concerned with cultural literacy. Each chapter includes an extensive descriptive bibliography for those who wish to explore particular topics in more depth. In addition, a fine selection of maps, paintings, and photographs illustrate the intricate structure of American life.
